# Filling valve, Series AS1-SSV

R412014749

#### General series information Series AS1

■ The AVENTICS Series AS1 is a modular, versatile maintenance unit for universal application. This Series offers compact dimensions, is highly efficient, lightweight and easy-to-use. The AVENTICS Series AS guarantees reliability, safety, and efficiency with a simplified assembly and maintenance efforts.

#### **Technical information**

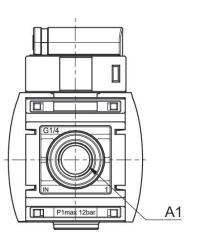

The pressure dew point must be at least 15  $^{\circ}$ C under ambient and medium temperature and may not exceed 3  $^{\circ}$ C .

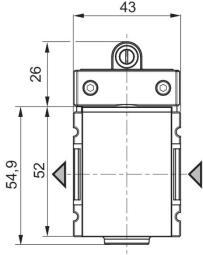

Nominal flow Qn with secondary pressure p2 = 6 bar at  $\Delta p$  = 1 bar

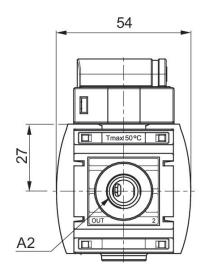

The filling valve builds up pressure slowly in the pneumatic systems, i.e. prevents a sudden pressure build-up during a recommissioning after a mains pressure failure or avoids emergency OFF switching. This allows dangerous abrupt cylinder motions to be avoided.

Do not position filling valves or filling units upstream of open consumers, such as nozzles, air barriers, air curtains, since these may prevent through connection of components.

#### Dimensions in mm

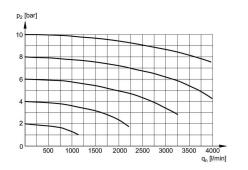

A1 = input A2 = output

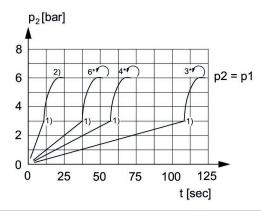

### Flow rate characteristic, p2 = 0,05 - 7 bar

p2 = Secondary pressure

qn = Nominal flow

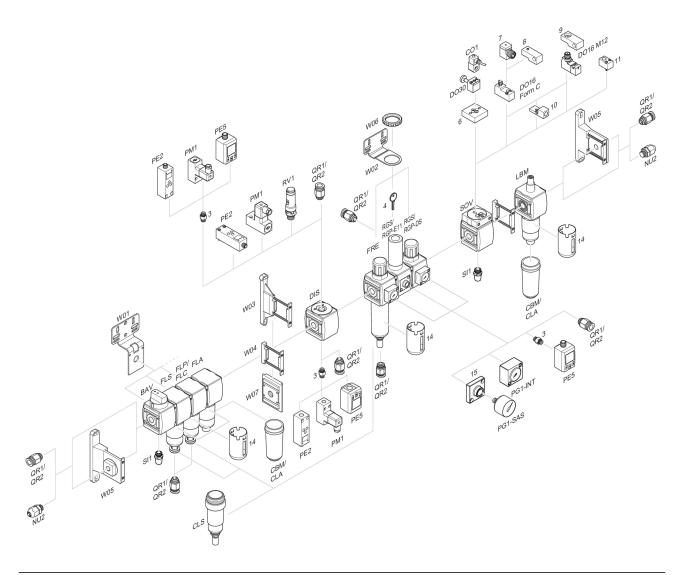

## Secondary pressure while filling

- p1 = Working pressure
- p2 = Secondary pressure t = filling time, adjustable via adjustment screw (throttle)
- 1) Switching point: adjustable filling time, fixed change-over pressure  $\approx 0.5 \text{ x}$
- 2) Throttle fully opened
  \* Adjustment screw rotations
