# Compact cylinder, Series CCI-SC R452000760

General series information

AVENTICS Serie CCI-SC Stopper Compact Cylinders

Pneumatic cylinders with reinforced piston rod, featuring high resistance to shocks and radial loads. Typically used in conveyor belts and other special machinery, to allow stopping loads smoothly and safely, up to 90Kg weight. Mounting holes dimensions are compatible with ISO 21287.

# **Technical data**

Industry Standards Piston Ø Stroke Ports Functional principle Cushioning Magnetic piston Cylinder special features

Pressure for determining piston forces Retracting piston force Extracting piston force Min. ambient temperature Max. ambient temperature Working pressure min. | Spring force max.   | 82 N           |
|---|----------------|
| Max. permissible radial bearing load                              | 6280 N         |
| Max. permissible radial bearing load F during switching operation | 1500 N         |
| Medium  | Compressed air |
| Min. medium temperature   | -20 °C         |
| Max. medium temperature   | 80 °C          |
| Max. particle size  | 50 µm          |
| Oil content of compressed air max.                                | 5 mg/m³        |

# Material

| Piston rod            | Stainless Steel |
|-----------------------|-----------------|
| Material, front cover | Aluminum        |
| Cylinder tube         | Aluminum        |
| End cover             | Aluminum        |
| Part No.              | R452000760      |

# **Technical information**

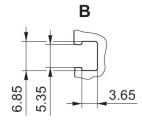

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

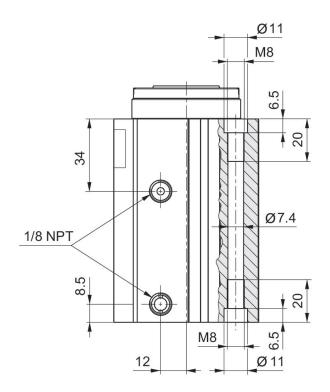

The oil content of compressed air must remain constant during the life cycle.

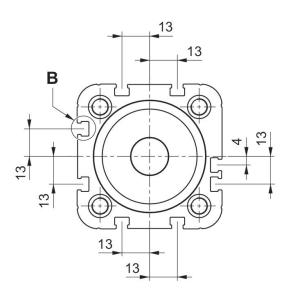

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

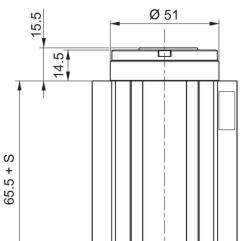

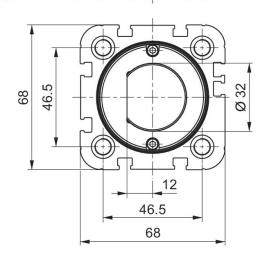

# Dimensions in mm
