

# ISO 15552, series CCL-IS

## R481609650

General series information  
AVENTICS Series CCL-IS Standard cylinders  
(ISO 15552)

- The CCL-IS (Cylinder Clean Line - ISO Standard) series cylinders complement the PRA series in the area of hygienic design and meet all requirements for use in the food sector. A special feature is the option to configure the air connections for supply and exhaust on just the base, which increases flexibility when designing the system's tubing concept..
- Optional: through piston rod, dry-run scraper, modular scraper system, lube unit, heat-resistant, especially high corrosion resistance, ATEX

### Technical data

Industry	Industrial
Standards	ISO 15552
Type	Dry-run scraper for increased service life in grease-free operation
Piston Ø	40 mm
Stroke	160 mm
Ports	G 1/4
Functional principle	Double-acting
Cushioning	Pneumatic adjustable cushioning
Magnetic piston	Piston with magnet
Environmental requirements	Industry standard suitable for use in food processing High corrosion
Piston rod	single
Cylinder special features	Dry-Run Scraper

Scraper	Dry-Run Scraper
Pressure for determining piston forces	6,3 bar
Retracting piston force	665 N
Extracting piston force	792 N
Min. ambient temperature	-20 °C
Max. ambient temperature	80 °C
Working pressure min.	1.5 bar
Working pressure max	10 bar
Piston rod thread	M12x1,25
Cushioning length	19 mm
Cushioning energy	9 J
Weight 0 mm stroke	0.92 kg
Weight +10 mm stroke	0.049 kg
Stroke max.	1900 mm
Medium	Compressed air
Min. medium temperature	-20 °C
Max. medium temperature	80 °C
Max. particle size	50 µm
Oil content of compressed air min.	0 mg/m <sup>3</sup>
Oil content of compressed air max.	5 mg/m <sup>3</sup>

## Material

Piston rod	Stainless Steel
Scraper material	Ultra-high-molecular-weight polyethylene (UHMW-PE)
Material tie-rod	Stainless Steel
Material, front cover	Aluminum
Cylinder tube	Aluminum
End cover	Aluminum
Part No.	R481609650

## Technical information

Further options can be generated in the Internet configurator.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

## Dimensions

Ø 32 - 63

Ø80 - 125

S=stroke

\* The flow control screw (1) only has a function in cylinders with adjustable cushioning.

Ø80 - 125

S = stroke

\* The flow control screw (1) only has a function in cylinders with adjustable cushioning.

## Cushioning diagram

V = velocity [m/s]  
m = mass

## Overview drawing

NOTE: This overview drawing is only for orientation to indicate where the various accessory parts can be fastened to the cylinder. The illustration has been simplified for this purpose. It is thus not possible to derive the dimensions from this overview.
