AVENTICS Series CD01-PA Standardized valve systems (ISO 15407-1)

The AVENTICS Series CD01-PA is the flexible valve system according to ISO 15407-1. The Series offers pneumatic or electrical control, vacuum or pressure of up to 16 bar, dual-pressure application, pressure-zones, ATEX certification, and various accessories allow for a wide range of modularity.

Mounting screws M4 with hexagon socket
Nacuration and a standard stranger and the standard stranger and stran
Mounting screw tightening torque 2.5 Nm
Weight 0.26 kg
Housing material Polyamide
Polyoxymethylene
Seal material Acrylonitrile butadiene rubber
Part No. 5763525280

Technical information

Versions with voltage of less than 50 V DC do not have a protective ground.

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

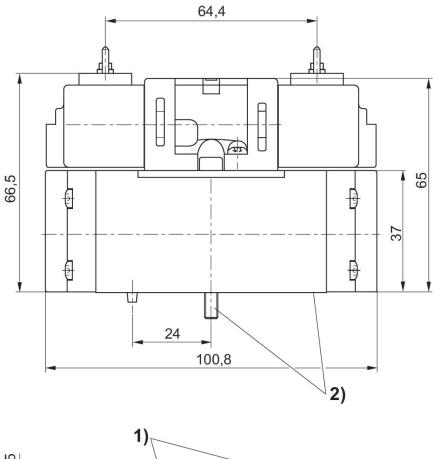

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

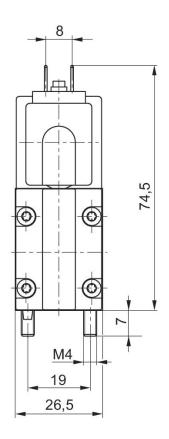

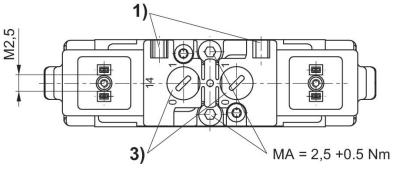

5/2-directional valve, Series CD01-PA
