3/2-directional valve, Series CD04

R412012700

Series CD04

2024-05-27

Series CD04

Qn max. 900 l/min 3/2, 5/2, 5/3 spool valves with metal housing For demanding environments

Technical data

Industry Industrial Activation Electrically

Valve type Spool valve, positive overlapping

Basic valve equipment

Switching principle

Basic valve without coil
3/2, with spring return

Valve function NC NO

Sealing principle Soft seal

Connection type Pipe connection Manual override with detent

Standard compressed air connection according to ANSI B1.20.3

Compressed air connection input 1/8-27 PTF
Compressed air connection output 1/8-27 PTF
Compressed air connection, exhaust 1/8-27 PTF

Compressed air connection pilot exhaust M5

Nominal flow Qn 900 I/min
Nominal flow Qn 1 to 2 900 I/min

3/2-directional valve, Series CD04

R412012700

Series CD04

2024-05-27

Nominal flow Qn 2 to 3	900 l/min
------------------------	-----------

Min. working pressure3 barMax. working pressure10 barMin. control pressure3 barMax. control pressure10 bar

Electrical connection type Plug

Electrical connection size EN 175301-803, form B

Electrical connection number of poles 3-pin

Connector standard EN 175301-803:2006

Protection class with connection IP65

Pilot Internal
Coil width 22 mm
Pilot valve width 26 mm
Compatibility index 14

Duty cycle 100 %

Min. ambient temperature $-15\,^{\circ}\text{C}$ Max. ambient temperature $50\,^{\circ}\text{C}$ Min. medium temperature $-15\,^{\circ}\text{C}$ Max. medium temperature $50\,^{\circ}\text{C}$

Medium Compressed air

Min. oil content of compressed air0 mg/m³Max. oil content of compressed air1 mg/m³Max. particle size50 μm

Weight 0.26 kg

Material

Housing material Die cast zinc

Polyamide fiber-glass reinforced

Seal material Acrylonitrile butadiene rubber

Part No. R412012700

Technical information

option valve: The input and output compressed air connections can be exchanged. The valve can thereby be used in the NC or NO operating mode.

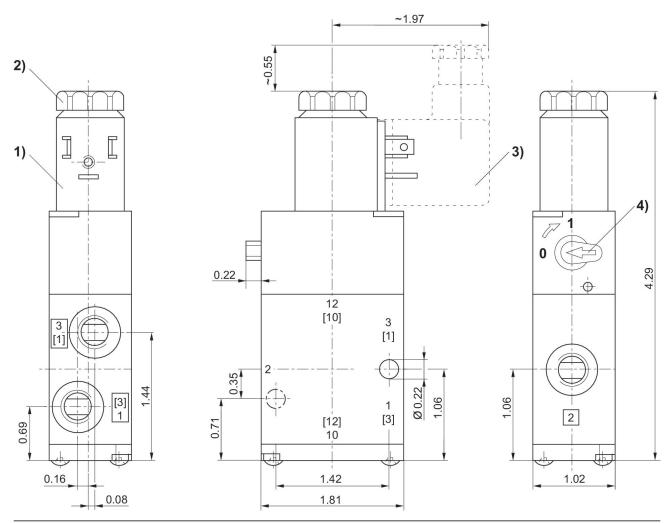

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

Dimensions in inches

¹⁾ Coil can be rotated at 90° intervals

²⁾ After removal of cap M5 internal thread

³⁾ Valve plug connector can be plugged at 180° intervals

⁴⁾ Manual override
