

AVENTICS Guide units

Technical data

| | |
|--------------------------|---------------------|
| Industry | Industrial |
| Piston Ø | 63 mm |
| Stroke | 1200 mm |
| Bearing type | Linear ball bearing |
| For standard cylinders | ISO 15552 |
| Min. ambient temperature | -20 °C |
| Max. ambient temperature | 80 °C |
| Weight 0 mm stroke | 4.7 kg |
| Weight +10 mm stroke | 0.025 kg |

Material

| | |
|--|-----------------------------|
| Bearing housings | Aluminum |
| Surface bearing housing | colorless anodized |
| Bearing type | Steel, chrome-plated |
| Carrying plate | Aluminum |
| Surface carrying plate | colorless anodized |
| Material flexible coupling in carrying plate | Stainless Steel |
| Material guide rods | Hardened heat-treated steel |
| Part No. | 0821401388 |

Dimensions

- 1) Lube nipple
- S = stroke
- SC = cylinder stroke
- X = max. play (axial)
- Y = min. play (radial)
- Hexagon in guide rod

Useful load

F = Useful load, Z = Projection

Bending due to 10 N load

F = useful load (at the load center), SF = bending, Z = projection

Bending due to own load

F = useful load (at the load center), SF = bending, Z = projection

Bending due to 10 N load

F = useful load (at the load center), SF = bending, Z = projection

Reduction of useful load for short-stroke

S = stroke

k=correction factor: normal=1, shock loaded=2 With a short stroke, the useful load figures determined from the diagram must be multiplied by the correction factor k. These short-stroke adjustments are already included in the load diagram for a displacement of up to 60 mm.

Useful load

Service life 5×10^6 m
F = Useful load, Z = Projection

Useful load

Service life 2×10^6 m
F = Useful load, Z = Projection
