AVENTICS Series CKP Rodless cylinders

2024-03-19

AVENTICS Series CKP Rodless cylinders

The AVENTICS Series CKP cylinders provide sturdy, ultraprecise guiding with excellent repeatability and are ideal for applications requiring the movement of heavy loads in space-critical machine environments.

Technical data

 $\begin{array}{ccc} \text{Industry} & \text{Industrial} \\ \text{Piston } \varnothing & 16 \text{ mm} \\ \text{Stroke} & 1000 \text{ mm} \\ \text{Ports} & \text{M7} \end{array}$

Functional principle Double-acting

Magnetic piston with magnetic piston

Guide ball rail guide

Easy2Combine Easy2Combine capable with electrical axes

Piston force 127 N
Pressure for determining piston forces 6,3 bar
Cushioning length 20 mm
Cushioning energy 1.5 J

Cushioning Pneumatically
Cushioning adjustable
Max. speed 2 m/s
Stroke max. 1400 mm
Min. working pressure 3 bar
Max. working pressure 8 bar
Min. ambient temperature -10 °C

R480163974

AVENTICS Series CKP Rodless cylinders

Max. ambient temperature 60 °C

Min. medium temperature -10 °C

2024-03-19

Max. medium temperature 60 °C

Medium Compressed air

 $\begin{array}{ll} \text{Max. particle size} & \quad \quad 5 \ \mu\text{m} \\ \text{Weight} & \quad \quad 6.46 \ \text{kg} \end{array}$

Material

Material front cover Aluminum
Surface cover anodized
Seal material Polyurethane
Material sealing strips Polyurethane

Stainless Steel

Material guide rail Aluminum Surface ball rail table anodized

Material guide rail Steel, chrome-plated

Surface guide rail hardened
Part No. R480163974

Technical information

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The delivered product is lubricated for lifetime.

This product may only be operated with oil-free, dry compressed air.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

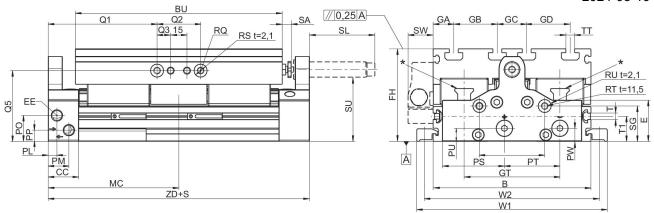

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

Additional Easy2Combine interface on CKP-CL

Permissible forces Fx, Fy, Fz and torques Mx, My, Mz

$$\frac{Mx}{Mx_{max.}} + \frac{My}{My_{max.}} + \frac{Mz}{Mz_{max.}} \le 1$$

With simultaneously moments on the cylinder this equation must be used in addition to the maximum moments check. In the cushioning phase of the movement additional forces occur and must be considered. Please use our calculation tool for rodless cylinders on the http://www.aventics.com.

R480163974

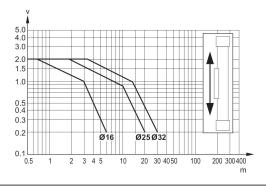

AVENTICS Series CKP Rodless cylinders

2024-03-19

CKP is part of the compact module family.

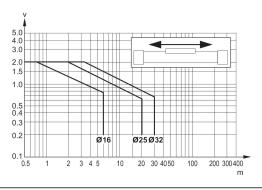

Further information can be found in the operating instructions.

Vertically mounted with pneumatic cushioning

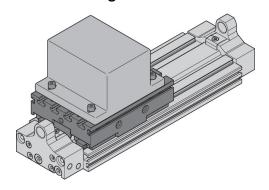

v_t = Piston velocity [m/s] m = Cushionable mass [kg]

Horizontally mounted with pneumatic cushioning

 v_t = Piston velocity [m/s] m = Cushionable mass [kg]

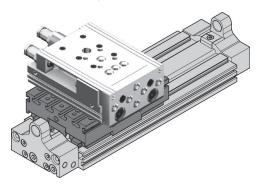

fastening a customer attachment onto the CKP with T-groove nuts.

fastening of CKP on BME (Basic mechanical elements) profile construction via connection plates and clamping fixtures

fastening of automation system Easy2Combine to CKP using center rings and T-groove nuts (example: mini slide MSC)

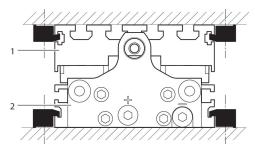

R480163974

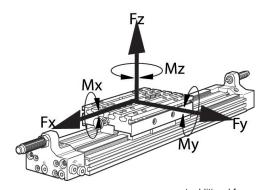

AVENTICS Series CKP Rodless cylinders

fastening of CKP to customer-built mounting base via clamping fixtures
