AVENTICS Series CKP Rodless cylinders

2024-03-19

AVENTICS Series CKP Rodless cylinders

The AVENTICS Series CKP cylinders provide sturdy, ultraprecise guiding with excellent repeatability and are ideal for applications requiring the movement of heavy loads in space-critical machine environments.

Technical data	
Industry	Industrial
Piston Ø	32 mm
Stroke	320 mm
Ports	G 1/8
Functional principle	Double-acting
Magnetic piston	with magnetic piston
Guide	ball rail guide
Easy2Combine	Easy2Combine capable with electrical axes
Piston force	507 N
Pressure for determining piston forces	6,3 bar
Cushioning length	20 mm
Cushioning energy	7 J
Cushioning	Pneumatically
Cushioning	adjustable
Max. speed	2 m/s
Stroke max.	1400 mm
Min. working pressure	3 bar
Max. working pressure	8 bar
Min. ambient temperature	-10 °C

R480163989

		cylinders
Max. ambient temperature	60 °C	2024-03-19
Min. medium temperature	-10 °C	2024-03-19
Max. medium temperature	60 °C	
Medium	Compressed air	
Max. particle size	5 µm	
Weight	10.29 kg	
Material		
Material front cover	Aluminum	
Surface cover	anodized	
Seal material	Polyurethane	
Material sealing strips	Polyurethane	
	Stainless Steel	
Material guide rail	Aluminum	
Surface ball rail table	anodized	
Material guide rail	Steel, chrome-plated	
Surface guide rail	hardened	
Part No.	R480163989	

Technical information

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The delivered product is lubricated for lifetime.

This product may only be operated with oil-free, dry compressed air.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

Additional Easy2Combine interface on CKP-CL

Permissible forces Fx, Fy, Fz and torques Mx, My, Mz

 $\frac{Mx}{Mx_{max.}} + \frac{My}{My_{max.}} + \frac{Mz}{Mz_{max.}} \le 1$

With simultaneously moments on the cylinder this equation must be used in addition to the maximum moments check. In the cushioning phase of the movement additional forces occur and must be considered. Please use our calculation tool for rodless cylinders on the http://www.aventics.com.

R480163989

CKP is part of the compact module family.

Further information can be found in the operating instructions.

Vertically mounted

Series CKP Rodless cylinders

AVENTICS

vt = Piston velocity [m/s] m = Cushionable mass [kg]

Horizontally mounted with pneumatic cushioning

vt = Piston velocity [m/s] m = Cushionable mass [kg]

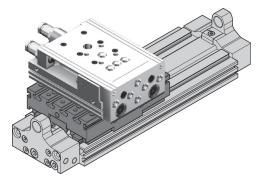

fastening of CKP on BME (Basic mechanical elements) profile construction via connection plates and clamping fixtures

fastening a customer attachment onto the CKP with T-groove nuts.

fastening of automation system Easy2Combine to CKP using center rings and T-groove nuts (example: mini slide MSC)
