

Serie ECD-SV

The AVENTICS Series ECD is an all-inclusive solution that combines vacuum generators, pilot valves, filters, silencers and pressure switches. Simplify installation and optimize your energy footprint by opting for the air economizer function, and increase your degree of status monitoring with the condition monitoring function.

Technical information

Note: All data refers to an ambient pressure of $[[1,013]]$ bar] and an ambient temperature of $[[20]]^{\circ}\text{C}$.
The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.
