

## AVENTICS Series KPZ Compact cylinders

The AVENTICS Series KPZ is a compact cylinders based on the widely used standard NFE 49 004. It offer a wide variety of variants and are suitable for a multitude of applications thanks to their sizing.

### Technical data

|  |                                    |
|--|------------------------------------|
| Industry                               | Industrial                         |
| Standards                              | NFE 49004                          |
| Piston Ø                               | 63 mm                              |
| Stroke                                 | 10 mm                              |
| Ports                                  | G 1/8                              |
| Functional principle                   | Double-acting                      |

| Max. torque for torsion protection | 1.5 Nm              |
| Stroke max.                        | 300 mm              |
| Medium                             | Compressed air      |
| Min. medium temperature            | -20 °C              |
| Max. medium temperature            | 80 °C               |
| Max. particle size                 | 50 µm               |
| Min. oil content of compressed air | 0 mg/m <sup>3</sup> |
| Max. oil content of compressed air | 5 mg/m <sup>3</sup> |

## Material

|                       |                 |
|-----------------------|-----------------|
| Piston rod            | Stainless Steel |
| Scraper material      | Polyurethane    |
| Seal material         | Polyurethane    |
| Material, front cover | Aluminum        |
| Cylinder tube         | Aluminum        |
| End cover             | Aluminum        |
| Part No.              | 0822396901      |

## Technical information

Use our Internet configurator to order variants with an external thread.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the “Technical information” document (available in <https://www.emerson.com/en-us/support>).

## Dimensions

S = stroke

T = View for sensor groove

1) External thread

Use our Internet configurator to order variants with an external thread.

## Maximum admissible lateral force dynamic

$F_{dyn}$  = dynamic lateral force  
 $X$  = distance between force application point and cylinder cover  
 $S$  = stroke

## Maximum admissible lateral force dynamic

$F_{dyn}$  = dynamic lateral force  
 $X$  = distance between force application point and cylinder cover  
 $S$  = stroke

## Maximum admissible lateral force static

$F_{stat}$  = static lateral force  
 $X$  = distance between force application point and cylinder cover

## Maximum admissible lateral force static

F stat. = static lateral force  
 X = distance between force application point and cylinder cover  
 S = stroke

## Overview drawing

\* Available for installation on KPZ for cylinder diameters 16 - 25 mm
