AVENTICS Series MSC Guide cylinders

The AVENTICS Series MSC mini slides have a compact design, require minimal installation space and can be optimally configured for virtually any automated handling task. A wide range of configuration options make the mini slide a truly universal handling component. Precise and reliable operation, coupled with a custom configuration and tailored to the specific application – these attributes allow the mini slides to assume the actuator role in efficient handling. The Series MSC offers high torque absorption and maximum stability. In addition, it provides technical features that guarantee optimally adjusted functions and maintenance-friendly processes. Fast, secure and efficiently connected with the special Easy-2-Combine Interface, the mini slides can be combined with the other components of a handling system without additional mounting plates.

Technical data

Industry	Industrial
Piston Ø	25 mm
Stroke	200 mm
Functional principle	Double-acting
Easy2Combine	capable
double piston	with double piston
Port	G 1/8
Cushioning	Pneumatically
Repetitive precision	0,3 mm
Min. working pressure	2 bar
Max. working pressure	10 bar
Min. ambient temperature	0 °C
Max. ambient temperature	60 °C
Medium	Compressed air
Retracting piston force, theoretical	520 N
Extracting piston force, theoretical	421 N
Max. speed	0.8 m/s
Cushioning length	7 mm
Cushioning energy	1.6 J

Min. oil content of compressed air	0 mg/m ³
Max. oil content of compressed air	1 mg/m ³
Max. particle size	5 µm
Pressure for determining piston forces with integrated ball rail guide	6,3 bar With integrated "High Performance" ball rail system
Weight	6.46 kg

Material

Housing material	Aluminum
Surface housing	anodized
Material piston rod	Stainless Steel
Material front plate	Aluminum
Surface front plate	anodized
Seal material	Polyurethane
Material ball rail table	Aluminum
Surface ball rail table	anodized
Material guide rail	Steel, chrome-plated
Surface guide rail	hardened
Material centering rings	Stainless Steel
Part No.	R480640213

Technical information

Repetitive precision after 100 consecutive strokes: 0,02 mm

Repeatability with variant with elastomer end stop: 0.3 mm

Cushioning length for variant with elastomer end stop: 10.5 mm

Base with air connections at the back and sides

Intermediate strokes can be configured.

Scope of delivery: incl. centering rings

R1 = stroke setting range for forward stroke

R2 = stroke setting range for return stroke

PE: cushioning: pneumatic, end stop: elastomer

PM: cushioning: pneumatic, end stop: metal

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in <https://www.emerson.com/en-us/support>).
