General series information Series NL2

The AVENTICS Series NL maintenance units are suitable for all areas: as individual components or as assembled maintenance units, for centralized or decentralized compressed air preparation, in compact or powerful versions, for use in high or low temperatures. This line offers a complete, customizable compressed air preparation technology. It includes an option to combine every component in the Series to achieve the desired function, making it possible to adjust the components precisely to the application requirements.

Technical information

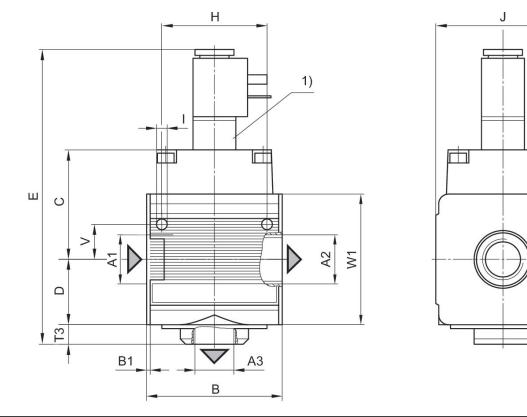

The pressure dew point must be at least 15 $^\circ\text{C}$ under ambient and medium temperature and may not exceed 3 $^\circ\text{C}$.

Nominal flow Qn with secondary pressure p2 = 6 bar at $\Delta p = 0,1$ bar

A change in the flow direction (from air supply on the left to air supply on the right) occurs by rotating installation by 180° about the vertical axis. Please see the operating instructions for further details.
