# 3/2-directional valve, Series A-Pilotair® R431005001

General series information AVENTICS Series A-Pilotair Directional valves

manually operated

## **Technical data**

| Industry                         | Inc |
|----------------------------------|-----|
| Туре                             | 2-  |
| Activation                       | Ma  |
| Nominal flow Qn                  | 13  |
| Compressed air connection output | Ø   |
| Working pressure min.            | 0 k |
| Working pressure max             | 13  |
| Sealing principle                | So  |
| Туре                             | Po  |
| Туре                             | Wi  |
| Version                          | 2-1 |
| Control pressure min.            | 0 8 |
| Control pressure max.            | 17  |
| Min. ambient temperature         | -4( |
| Max. ambient temperature         | 71  |

| Min. medium temperature            | -40 °C            |
|------------------------------------|-------------------|
| Max. medium temperature            | 71 °C             |
| Medium                             | Compressed air    |
| Oil content of compressed air min. | 0 mg/m³           |
| Oil content of compressed air max. | 1 mg/m³           |
| Max. particle size                 | 50 µm             |
|                                    |                   |
| Compressed air connection input    | Ø 1/4"            |
| Weight                             | 0.68 kg           |
| Housing material                   | Die-cast aluminum |
| Surface housing                    | chromated         |
| Surface front cover                | chromated         |
| Part No.                           | R431005001        |

### **Technical information**

The model 2-HA-1R, 2-HA-1LR and 2-HA-1RW Valves are the same as the 2-HA-1 and 2-HA -1L models except that the cam is reversed to obtain pull instead of push operation. The 2-HA-1R model may also be mounted with the handle on the left-hand side for tandem push operation with the 2-HA-1 model.

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

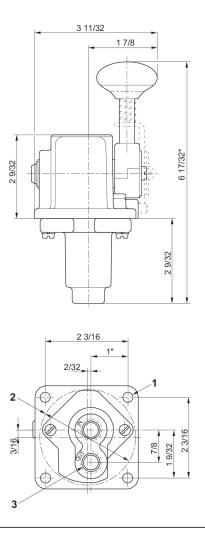

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

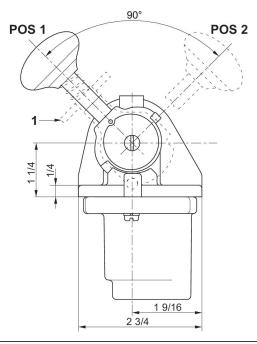

## **Dimensions in inches**

9/32 diameter (4) places 1) Mounting hole Ø2 9/16 \*Also available with handle 2" longer

#### Handle position

1) Optional Handle Latch

## Handle position

| Handle<br>position   |   | 2 |
|----------------------|---|---|
| Out Port<br>Supplied | х |   |

X denotes port supplied in that position. Empty block denotes port exhausted in that position.
