

# Sensors, Series SM6

## R412010415

General series information  
AVENTICS Series SM6 Distance measuring sensors

- The AVENTICS Series SM6 are analog distance measuring sensors, which ensure a continuous detection of the piston movements in measuring ranges from 32 mm up to 256 mm. A control element on the sensor allows for setting of the zero point and variable selection of the distance measurement range. The compact sensors are also easy to mount – either directly in the cylinder slot or to the profile using clamp mountings.

cULus

Protection class	IP67
Min. ambient temperature	-20 °C
Max. ambient temperature	70 °C
max. measuring range	224 mm
LED status display	Yellow
Max. measuring range resolution	0,05 mm
Linearity deviation	0,3 mm
Sampling speed	3 m/s
Shock resistance	30 g / 11 ms
Vibration resistance	10 - 55 Hz, 1 mm
Display	LED

## Material

Housing material	Polyarylamide, fiber-glass reinforced
Part No.	R412010415

## Technical information

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in <https://www.emerson.com/en-us/support>).
