# AVENTICS Series CCI Compact cylinders (ISO 21287)

The AVENTICS Series CCI (ISO 21287) cylinders stand for innovative, compact construction and an easy to clean design. The Series CCI (ISO 21287) is ideal for long strokes and increased requirements for optimized cycle times and moving masses. The sensors can be installed quickly and easily on all sides and over the entire cylinder lengths.

#### Technical data

| Industrial                         |
|------------------------------------|
| ISO 21287                          |
| 32 mm                              |
| 80 mm                              |
| G 1/8                              |
| Double-acting                      |
| Pneumatic pre-adjusted cushioning  |
| Piston with magnet                 |
| Industry standard<br>ATEX optional |
| Internal thread                    |
| M8                                 |
| single                             |
| Standard Industry Scraper          |
| 6,3 bar                            |
| 435 N                              |
| 507 N                              |
| -20 °C                             |
| 80 °C                              |
| 1 bar                              |
| 10 bar                             |
| 1.02 J                             |
| 0.233 kg                           |
| 0.042 kg                           |
|                                    |

| Max. oil content of compressed air | 5 mg/m³        |

#### Material

| Piston rod            | Stainless Steel |
|-----------------------|-----------------|
| Scraper material      | Polyurethane    |
| Seal material         | Polyurethane    |
| Material, front cover | Aluminum        |
| Cylinder tube         | Aluminum        |
| End cover             | Aluminum        |
| Part No.              | R481654400      |

#### **Technical information**

ATEX-certified cylinders with identification II 2G Ex h IIC T4 Gb / II 2D Ex h IIIC T135°C Db\_X can be generated in the Internet configurator.

The operating temperature range for ATEX-certified cylinders is -20°C ... 60°C.

With cylinders with a piston rod extension, dimensions "WH" and "ZB" are increased by the value of the piston rod extension.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).

### Overview drawing

NOTE: This overview drawing is only for orientation to indicate where the various accessory parts can be fastened to the cylinder. The illustration has been simplified for this purpose. It is thus not possible to derive the dimensions from this overview.
