#### **AVENTICS Series RPC Round cylinders**

The AVENTICS Series RPC round profile cylinders offer a wide variety of connection options. They are easy to clean and suitable for packaging applications in the food industry due to food grade lubricants. The Series RPC can also be used in standard applications across machine automation needs.

### Technical data

- Industry Type Piston Ø Stroke Ports Functional principle Cushioning Magnetic piston Environmental requirements
- Piston rod thread type Piston rod thread Piston rod Scraper Pressure for determining piston forces Retracting piston force Extracting piston force Min. ambient temperature Max. ambient temperature Min. working pressure Max. working pressure Cushioning length Cushioning energy Weight 0 mm stroke
- Industrial Version: standard type 32 mm 160 mm G 1/8 Double-acting Pneumatic adjustable cushioning Piston with magnet Industry standard ATEX optional External thread M10x1,25 single Standard Industry Scraper 6,3 bar 435 N 505 N -20 °C 80 °C 1 bar 10 bar 16.5 mm 4.8 J 0.34 kg

#### Technical information

Use our Internet configurator to order these variants with coarse-pitch thread M10x1.5 or M12x1.75. ATEX-certified cylinders with identification II 2G Ex h IIC T4 Gb / II 2D Ex h IIIC T135°C Db\_X can be generated in the Internet configurator.

The operating temperature range for ATEX-certified cylinders is -20°C ... 60°C.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).
