## AVENTICS Series RTC Rodless cylinders

The AVENTICS Series RTC rodless cylinders offer optimized stroke length in a compact size. The unique oval piston shape and one-piece slide/piston unit are just two characteristic features of RTC Series rodless cylinders besides their many common equipment options. They are available in four variants: as a basic version, slide bearing, compact guide and heavy duty versions for large loads. With different key strengths, they cover a large range of movements and positions. This saves space and facilitates machine design. The range of applications extends from piston diameters of 16 mm up to 80 mm and stroke lengths up to 9900 mm. The cylinders feature extreme repeatability and cover a large speed range from 0.01 m/s to >20 m/s.

## Technical data

Industry	Industrial
Piston Ø	50 mm
Stroke	500 mm
Ports	G 1/4
Functional principle	Double-acting
Magnetic piston	with magnetic piston
Guide	integrated guide
Version rodless cylinder	Basic Version
Piston force	1237 N
Pressure for determining piston forces	6,3 bar
Cushioning length	20 mm
Cushioning energy	15 J
Cushioning	Pneumatically
Cushioning	adjustable
Max. speed	0.8 m/s
Stroke max.	9900 mm
Min. working pressure	2 bar
Max. working pressure	8 bar
Min. ambient temperature	-25 °C

Max. ambient temperature	60 °C
Medium	Compressed air
Min. oil content of compressed air	0 mg/m <sup>3</sup>
Max. oil content of compressed air	1 mg/m <sup>3</sup>
Max. particle size	5 µm
Weight 0 mm stroke	1.39 kg
Weight +10 mm stroke	0.031 kg

## Material

Material cylinder tube	Aluminum
Surface cylinder tube	anodized
Material front cover	Aluminum
Surface cover	anodized
Seal material	Polyurethane
Material sealing strips	Polyurethane Stainless Steel
Material guide rail	Aluminum
Surface ball rail table	anodized
Part No.	R481608195

## Technical information

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The delivered product is lubricated for lifetime.

Further dimensions, referring to more than just the long slide, can be found in the section on the basic version of the RTC-BV.

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in <https://www.emerson.com/en-us/support>).

50 mm	M12	130.5	361	2.14

1) thread depth: 6 mm for piston Ø 16–25 mm, 10 mm for piston Ø 32–50 mm, 15 mm for piston Ø 63–80 mm

2) thread depth: 9 mm for piston Ø 16–40 mm, 12 mm for piston Ø 50–63 mm

## Permissible parallelism offset

## Permissible forces Fx, Fy, Fz and torques Mx, My, Mz

$$\frac{M_x}{M_{x_{max.}}} + \frac{M_y}{M_{y_{max.}}} + \frac{M_z}{M_{z_{max.}}} \leq 1$$

With simultaneously moments on the cylinder this equation must be used in addition to the maximum moments check. In the cushioning phase of the movement additional forces occur and must be considered. Please use our calculation tool for rodless cylinders on the <http://www.aventics.com>.

## Support span

Max. support span L [mm] as a function of F [N] at a deflection of 0.5 mm

## Limit diagram for pneumatic cushioning with horizontal mounting

$v_t$  = Piston velocity [m/s]  $m$  = Cushionable mass [kg]

The values for the cushionable mass  $m$  and piston velocity  $v$  must be on or below the graph for the selected piston diameter.
