TC08 2024-10-17

Series

- Excellent ratio of installation space and flow rate
- Large selection of electrical connections
- Electrical or pneumatic operated
- Long service life
- Adjustable coil with four 90° positions

## AVENTICS Series TC08 Directional valves

The AVENTICS Series TC08/TC15 includes a wide range of spool valves with housings made of high-performance polymers with robust and flexible metal inserts. It is designed for flow rate performances from 800 to 1500 l/min. These directional valves are easy to assemble, making them ideal for applications requiring the highest efficiency in limited spaces.

| Technical data                     |                                   |  |
|------------------------------------|-----------------------------------|--|
| Industry                           | Industrial                        |  |
| Activation                         | Electrically                      |  |
| Valve type                         | Spool valve, positive overlapping |  |
| Switching principle                | 5/3, exhausted center             |  |
| Actuating control                  | Double Solenoid                   |  |
| Sealing principle                  | Soft seal                         |  |
| Connection type                    | Pipe connection                   |  |
| Manual override                    | without detent                    |  |
|                                    |                                   |  |
| Compressed air connection input    | G 1/8                             |  |
| Compressed air connection output   | G 1/8                             |  |
| Compressed air connection, exhaust | G 1/8                             |  |
|                                    |                                   |  |
| Nominal flow Qn                    | 700 l/min                         |  |
| Flow conductance b                 | 0.34                              |  |
| Flow conductance C                 | 3 l/(s*bar)                       |  |
|                                    |                                   |  |
| Min. working pressure              | -0.9 bar                          |  |
| Max. working pressure              | 10 bar                            |  |
|                                    |                                   |  |

Material front plate

Acrylonitrile butadiene rubber Polyurethane Brass Die cast zinc Polyamide fiber-glass reinforced

Part No.

#### **Technical information**

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

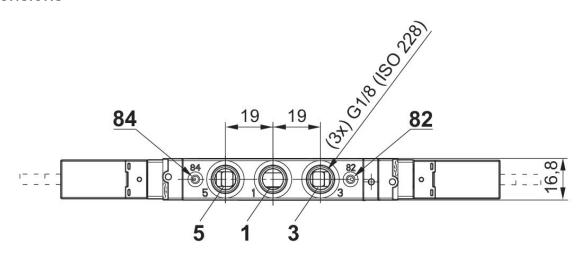

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).
