## AVENTICS Series 490/579/589 Directional Control Valves

The AVENTICS Series 490/579/589 have a robust polymer housing that can be mounted individually or as a block. They cover a large range of voltages and feature fast connections for pneumatic tubing.

### Technical data

|                     |                         |
|---------------------|-------------------------|
| Industry            | Industrial              |
| Activation          | Electrically            |
| Valve type          | Poppet valve            |
| Switching principle | 3/2, with spring return |
| Valve function      | NO                      |
| Sealing principle   | Soft seal               |
| Connection type     | Pipe connection         |

|                                       |        |
|---------------------------------------|--------|
| Compressed air connection input       | Ø 1/4" |
| Compressed air connection output      | Ø 1/4" |
| Compressed air connection, exhaust    | 5/16"  |
| Compressed air connection pilot input | Ø 4    |

|                       |         |
|-----------------------|---------|
| Min. working pressure | 0.5 bar |
| Max. working pressure | 8 bar   |
| Min. control pressure | 3 bar   |
| Max. control pressure | 10 bar  |

# 3/2-directional valve, Series 589

## Material

|                  |  |
|------------------|--|
| Housing material | Polyamide                                      |
| Seal material    | Acrylonitrile butadiene rubber<br>Polyurethane |
| Part No.         | 5894420320                                     |

## Technical information

At an ambient temperature of [[40] °C] the max. working pressure is [[10] bar].

Versions with voltage of less than 50 V DC do not have a protective ground.

Working pressure with vacuum operation, connection 1: min. [[3] bar], connection 3: min. -[[0.95] bar]

The control pressure must be at least as high as the working pressure.

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the “Technical information” document (available in <https://www.emerson.com/en-us/support>).
