Series WV02 2024-02-15

Series WV02

The AVENTICS Series WV02 spool valves with anodized aluminium housing feature short switching times and low switching pressures, while offering low power consumption due to a seal with low friction co-efficient.

Technical data	
Industry	Industrial
Activation	Electrically
Valve type	Spool valve, positive overlapping
Basic valve equipment	Basic valve without coil
Valve function	NO/NC
Sealing principle	Soft seal
Connection type	Pipe connection
Compressed air connection input	G 1/8
Compressed air connection output	G 1/8
Nominal flow Qn	600 l/min
Min. working pressure	2.2 bar
Max. working pressure	10 bar
Min. control pressure	2.2 bar
Max. control pressure	10 bar
Electrical connection type	Plug

Technical information

The min. control pressure must be adhered to, since otherwise faulty switching and valve failure may result!

The pressure dew point must be at least 15 °C less than ambient and medium temperature and may not exceed 3 °C.

The oil content of compressed air must remain constant during the life cycle.

Use only the approved oils from AVENTICS. Further information can be found in the "Technical information" document (available in https://www.emerson.com/en-us/support).
