Hand lever valve VHER-H-B43C-G14 Part number: 3514710

FESTO

General operating condition

Data sheet

In dual press than at connectural design Rotary gate was minal width as minal width flow consideration note Operate by had ling principle Hard Pe of control Rotary gate was minal width flow considerate by had ling principle Rotary gate was minal width flow consideration with flow consideration Rotary gate was minal with flow consideration with flow consideration Rotary gate was minal with flow consideration with fl
