

Flow sensors SFAM

FESTO

Key features

At a glance

- [1] Threaded mounting of individual device with laminar flow inlet
- [2] Can be combined with MS6 or MS9 series service units
- [3] – Very bright LCD display with blue background and white 9-segment display
– Bar chart depicts current measured value
– Switching point-dependent colour change
- [4] Central electrical connection via an M12 plug

Compact and capable of high flow rates

This modular flow sensor can operate either as a standalone unit or can be easily combined with the MS series service units.

The sensor provides:

- Absolute flow rate information
 - with threshold values and
 - convenient switching point adjustment via a display
- Cumulative air consumption measurement
- Patented – adjustable consumption-based switching pulse for cumulative air consumption measurement via the switching output

Convenient

- Festo plug and work solution
- Quick and easy menu prompting
- Fast commissioning thanks to easy-to-use, intuitive teach-in function
- Manual consumption measurement with start/stop and reset functionality

Systematically more reliable

The sensor covers a large measuring range with a specified accuracy thanks to its high dynamic response of 1:100. The sensor can provide precise information even when flow conditions are fluctuating and unreliable.

Easy to combine

With MS6 or MS9 series service unit thanks to innovative prism clamping technology. This saves additional installation time.

Easy to operate

- A large, illuminated LCD display increases the operational safety and makes the currently displayed flow rate or consumption values easy to read.
- Measured values outside the measuring range are visualised: flow rates are shown flashing.
- Switching outputs (NPN/PNP) can be changed via the menu
- Values that fall below or exceed the threshold values can also be identified from a distance or if the sensor is in an inaccessible location by the display changing colour.
- Easy to switch the current sensor settings in SHOW mode
- Simple switching between consumption and flow rate indication
- Values shown on the display:
 - can be shown for different standard conditions (DIN 1343, ISO 2533, ISO 6358)
 - can be filtered/averaged independently of the analogue output in the case of high dynamic response of the measurement

Flexible installation

The SFAM has an extremely compact, space-saving design optimised for flow performance.

Right or left?

The fluid stream of the unidirectional flow sensor can be selected: either from left to right or from right to left.

Peripherals overview

SFAM-62-...-M for manifold assembly in MS6 series service unit
with laminar flow cartridge

SFAM-62-...-T/W for individual assembly
with sub-bases and laminar flow inlet

Mounting components and accessories		In service units of series MS6	Individual device	→ Page/Internet
[1]	Connecting plate MS6-AG...	■	■ Included in the scope of delivery	ms6-ag
[2]	Mounting bracket MS6-WB	-	■ Included in the scope of delivery with mounting type -W	ms6-wb

Data sheet

Function

Current output 2SA

Voltage output 2SV

- - Flow rate
10 ... 1000 l/min
30 ... 3000 l/min
50 ... 5000 l/min
100 ... 10 000 l/min
150 ... 15 000 l/min

- - Temperature range
0 ... +50°C

- - Operating pressure
0 ... 16 bar

- Analogue output 0 ... 10 V, adjustable switching outputs 2x PNP or 2x NPN
- Analogue output 4 ... 20 mA, adjustable switching outputs 2x PNP or 2x NPN
- Freely selectable pulse output for consumption measurement

- Analogue filter for setting the rise time
- Digital filter for smoothing the display values

SFAM-...-M

SFAM-...-T

- - **Note**
To comply with the specified accuracies, the SFAM must be supplied via the following connections:
 - SFAM-62-...-M via a pneumatic connection of at least G 1/2, SFAM-90-...-M via a pneumatic connection of at least G 3/4.
 - SFAM-62-...-T/W via a connection with an inside diameter of at least 10 mm, SFAM-90-...-T via a connection with an inside diameter of at least 20 mm.

- - **Note**
Downstream of a filter regulator MS-LFR or pressure regulator MS-LR, the branching module MS6-FRM-1/2 (for size MS6) or MS9-FRM-G (for size MS9) must be installed upstream of the flow sensor SFAM to maintain the indicated accuracies.

General technical data	
Certification	RCM trademark c UL us - Recognized (OL)
Certificate issuing authority	UL E322346
CE marking (see declaration of conformity)	To EU EMC Directive ¹⁾
	To EU RoHS Directive
UKCA marking (see declaration of conformity)	To UK instructions for EMC
	To UK RoHS instructions
KC mark	KC EMC
Note on materials	RoHS-compliant

1) For information about the area of use, see the EC declaration of conformity at: www.festo.com/sp → Certificates.
If the devices are subject to usage restrictions in residential, commercial or light-industrial environments, further measures for the reduction of the emitted interference may be necessary.

ATEX	
EU certification	Ex2
ATEX category gas	II 3G
Type of ignition protection for gas	Ex nA IIC T5 X Gc
ATEX category for dust	II 3D
Type of ignition protection for dust	Ex tc IIIB T80°C X Dc IP54
Explosion-proof ambient temperature	0°C ≤ Ta ≤ +50°C
CE marking (see declaration of conformity)	To EU Explosion Protection Directive (ATEX)

Data sheet
