TWINOX4 safety light curtain to RLY3-OSSD2 safety relay with restart interlock and external device monitoring

Ⓢ Output circuits: These contacts must be incorporated into the control such that the dangerous state is brought to an end if the output circuit is open. For categories 4 and 3, they must be incorporated on dual-channels (x, y paths). Single-channel incorporation into the control (z path) is only possible with a single-channel control and taking the risk analysis into account.
