Concept of operation

Teaching-in of a sequence of up to eight contrast or color features

Suitable for teaching a sequence of up to eight contrast or color features.
(here's an example of four contrast or color features)

1. Position the first contrast or color feature under the light spot.

Confirm with the SET pushbutton.

2. Position the second contrast or color feature under the light spot.

Confirm with the SET pushbutton.

3. Position the third contrast or color feature under the light spot.

Confirm with the SET pushbutton.

4. Position the last contrast or color feature to be detected under the light spot.

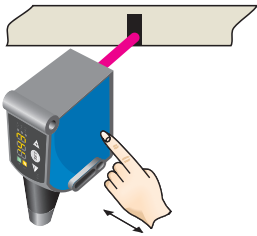

Confirm with the SET pushbutton.

KTS/KTX Prime - Setting the switching threshold (color mode)

Suitable for teaching in color properties.

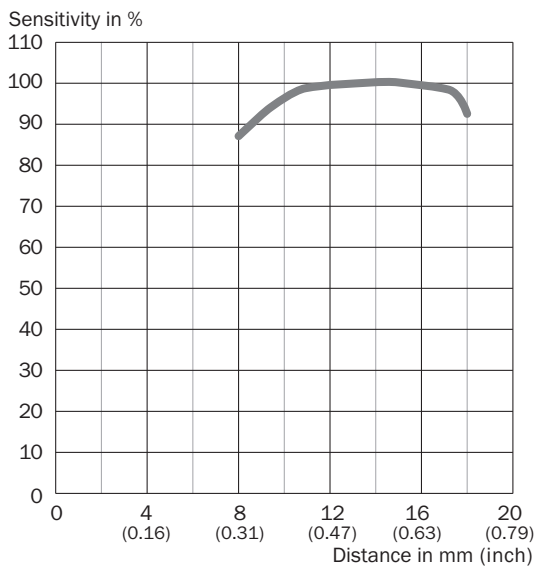

1. Position mark/color property

When detecting the contrast or color to be detected, "1st" flashes. Press set button. The Quality of Teach-in is displayed.
