microScan3 Core I/O with restart interlock and external device monitoring at RLY3-OSSD1 safety relay

ⓘ Output circuits: These contacts must be incorporated into the control such that the dangerous state is brought to an end if the output circuit is open. For categories 4 and 3, they must be incorporated on dual-channels (x, y paths). Single-channel incorporation into the control (z path) is only possible with a single-channel control and taking the risk analysis into account.

Uni-I/O 1: configured as input reset

Uni-I/O 2: configured as input external device monitoring (EDM)

Uni-I/O 3: configured as output reset required
