Detailed technical data

Technical specifications

Wire draw mechanism
HighLine wire draw mechanism for face mount flange with 10 mm shaft, measuring range 0 m \ldots 20 m
Without encoder
0 m 20 m
≤ 2 mm
≤ ± 2 mm
≤ 5 mm
6 kg (Wire draw mechanism)
2.6 g/m
Highly flexible stranded steel 1,4401 stainless steel V4A
Plastic
Aluminum (anodised), plastic
332.4 mm
20.2 m
\leq 10 N 20 N ¹⁾
0.81 mm
30 m/s ²
6 m/s
To calculate the resolution of the system please use following formula:length of wire draw per revolution / steps per revolution = resolution of the combination of wire draw + encoder
-30 °C +70 °C
IP64
Typ. 1,000,000 cycles ^{2) 3)}

 $^{1)}$ These values were measred at an ambient temperature of 25 $\,^{\circ}\text{C}.$ There may be variations at other temperatures.

 $^{\left(2\right) }$ Average values, which depend on the application.

³⁾ The service life depends on the type of load. This is influenced by environmental conditions, the installation location, the measuring range in use, the traversing speed, and acceleration.

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
