

UP56

Non-contact, precise ultrasonic level sensor – even for demanding media.

SICK
Sensor Intelligence.

Technical data overview

Measurement principle	Ultrasonic sensor
Detection principle	Non contact
Medium	Fluids / bulk solids / Fluids (depending on type)
Measurement	Switch, Continuous
Process temperature	-25 °C ... +85 °C (depending on type)
Process pressure	0 bar ... 6 bar, gauge pressure, gauge pressure for UP56 Pure mini (depending on type)
Output signal	1 x push-pull: IO-Link 1.1 (process data, diagnostics, parameterization, data repository) 1 x PNP + 4 mA ... 20 mA / 0 V ... 10 V 2 x PNP 2 x NPN 4 mA ... 20 mA (depending on type)

Product description

The UP56 ultrasonic level sensor is the ideal solution for demanding applications. The PTFE-protected transducer is pressure resistant up to 6 bar and also very resistant to difficult media. Stainless steel, PVDF and PTFE are also available as housing materials. This means the UP56 is suitable for non-contact measurement of aggressive, viscose, inhomogeneous or abrasive liquids and bulk materials. Thanks to the combination of two switching signals in one device, idling and overflow can be monitored at the same time. With an analog output and switching signal, continuous measurement with a separate overflow signal is also possible. The sensor is easy to parameterize using the integrated display, IO-Link or a Connect+ adapter.

At a glance

- Operating range: up to 3.4 m, limiting range: up to 8.0 m
- Pressure resistant up to 6 bar, temperature resistant up to 85 °C
- PTFE-coated membrane and GF D40 process connection made of PTFE
- Analog output can be switched between 4 mA ... 20 mA and 0 V ... 10 V
- Different sizes available
- Simple operation, also via Connect+
- IO-Link 1.1

Your benefits

- Non-contact and therefore wear-free measurement even in pressurized containers
- Universal application – even in difficult media such as acids or bases
- Quick and easy parameterization
- Switching output and analog output in a single device
- Adjustable ultrasonic cone for stable measurements even in tight installation spaces
- Reliable blanking of stirrers possible
- Measures accurately and reliably even in mediums with density fluctuations

Fields of application

- Level monitoring of equalizing and compensating reservoirs
- Level monitoring of bulk materials
- Fill level measurement of wet chemical processes in the electronics and solar industry
- Fill level measurement of feed tanks for the additional dosing of acids and alkalines
- Level monitoring of bulk materials

Type code

Coverage

1	30 ... 250 mm
2	85 ... 350 mm
3	200 mm ... 1,300 mm
4	350 mm ... 3,400 mm
6	65 ... 700 mm

Connectivity

1	M12 round connector x 1, 5-pin
2	M12 round connector x 1, 4-pin

Process connection / Housing

1	G thread, stainless steel 1.4571 / plastic PBT, TPU, with display
2	G thread, stainless steel 1.4571 / stainless steel 1.4571, without display
4	GF connection D40, PTFE / plastic PP without display
5	GF connection D40, PTFE / plastic PP without display / short design (Mini)
7	G thread, PVDF / plastic PBT, TBU, with display
A	NPT thread, stainless steel 1.4571 / plastic PBT, TPU, with display
B	NPT thread, stainless steel 1.4571 / stainless steel 1.4571, without display
C	NPT thread, PVDF / plastic PBT, TPU, with display

Output function

2	2 x PNP transistor output
4	2 x NPN transistor output
5	Push-pull: PNP/NPN; IO-Link 1.1 (process data, diagnostics, parameterization, data repository)
6	Analog, current output
8	Analog, current and voltage output + 1 PNP transistor output

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
