

# Get Alarm Notifications Anywhere, Anytime

WIN-911 Mobile gives you a faster, easier way to resolve industrial alarm conditions while you're on the go.

## 'Working On the Go' Just Got Easier

The much-anticipated update to WIN-911 Mobile has arrived:

- See detailed alarm event history on your phone or tablet
- Quickly change callout lists and schedules from the mobile app
- View alarm events in your local language

### Stay in Sync

**Push notifications** let you quickly see what is wrong, send an acknowledgment, and monitor alarm condition changes in real-time, right from your smartphone.

### Communicate Effortlessly

**Chat** helps your entire team converse, brainstorm, and share solutions on-the-fly, from wherever they are — whether in the plant, at home, or on the road.

### Work More Efficiently

**Team** shows you who has seen an alarm as well as who has acknowledged it, reducing guesswork and redundant responses.

### Easily Track Alarm History

Whether on the road or at the office, you can quickly see who has acknowledged an alarm in the new Alarm History Tab. And since events stay on the system for up to 31 days, you'll have an accurate and detailed event log ready to review at your team meetings.

### One-Click Schedule and Callout List Changes

Now you can quickly make changes to notification callout settings right from your phone or tablet, without having to access the WIN-911 Workspace. Our new 'Mobile Operator Workspace' option mirrors all the functions of our Operator Workspace for authorized users.

"After my first WIN-911 project, I am very impressed. Easy to install, very flexible, and backed up with good documentation."

**Chris Wilson**

Consultant Solutions  
Architect, Novotek Ltd.

## Updated Localization for Your Phone

Release 3 includes newly updated localization languages to match our workstation version.

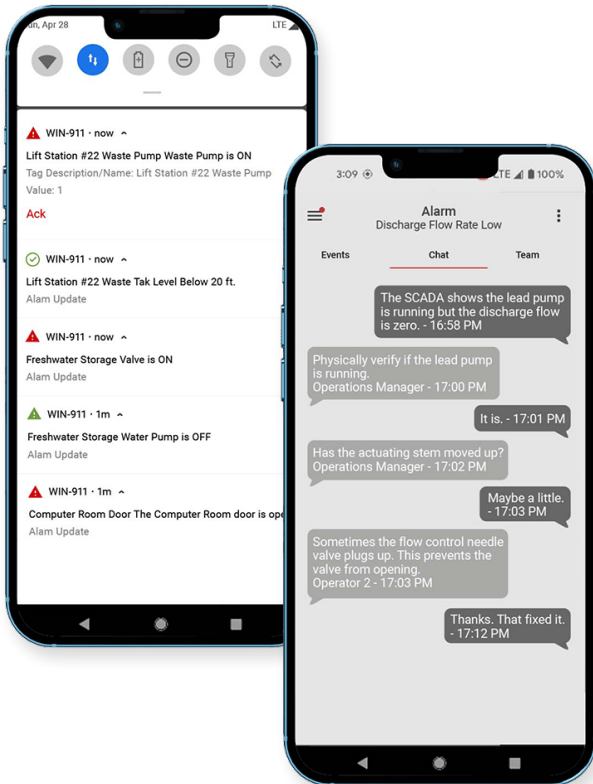

## Industrial-Grade Security

Get peace of mind knowing your plant network and communications are protected by encrypted outbound HTTPS and Microsoft's hardened Azure-Based login authentication.

## The World's #1 Alarm Notification App for a Reason

- Direct connects with all leading SCADAs/HMIs including GE, Rockwell, Aveva, Wonderware.
- Multiple notification methods including voice, email, text, and Android/iOS app.
- Supported by thousands of IT professionals, system integrators, and distributors worldwide.

## Try the Live Demo Now (it's free)
